Use this template to prepare artwork for your BEBCO order.

Open this document with Adobe Illustrator (version CS or higher).

Open the Layers pallet (F7) and select layer titled "Imprint Art". Position your artwork on the template in the imprint area. Please convert all type to outlines to avoid potential font issues. Note that if we are to make type corrections that we will need you to supply the original font files.

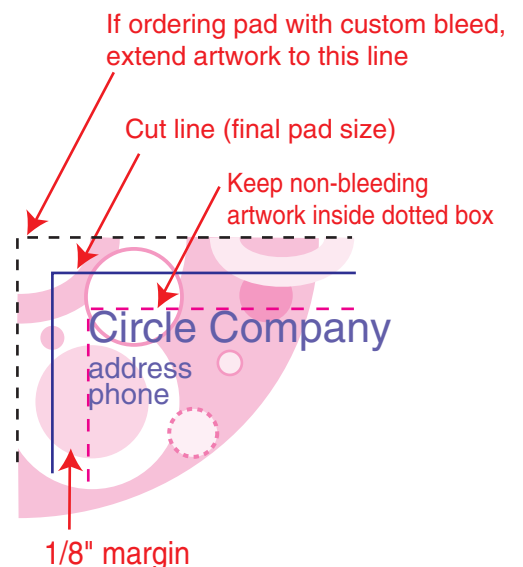

Now select the "Info" layer, add your company name and imprint colors where noted and save. Do not rename the file or do "save as" so that the separate layer information will remain intact.

You are now ready to attach the template with artwork to an email with your order addressed to art@bebco.com.

For more detailed instructions on the use of this template and how to submit, visit us online at www.bebco.com.

Check the [Art Requirements](#) section of our website for more information on artwork preparation.

PHANTOMS - 5-10% tints work best in most situations. Text may become illegible when printed as a phantom.

Template art will not print.
